

MOHAMMED NAYEEM

SENIOR REACT.JS DEVELOPER

Bengaluru, India • +91 99454 90735 • nayeem.gmit@gmail.com

PROFESSIONAL SUMMARY

Senior front-end engineer with 15 years in software development, the last 8+ focused on React.js. Currently a core contributor to WPP's enterprise design system, where I build and maintain a library of 76+ reusable, high-performance UI components consumed by React, Vue, and Angular applications company-wide. I define front-end architecture and coding standards, lead accessibility (WCAG 2.1 AA) and performance programmes, conduct rigorous code reviews, and mentor engineers through review feedback and reusable playbooks. Strong track record of shipping complex migrations (rich-text editor, major-version API cleanups) and building automated testing infrastructure (Jest, Playwright, axe-core).

TECHNICAL SKILLS

React ecosystem: React.js 18 (expert) — Hooks, component lifecycle, performance optimisation, reusable component architecture; Next.js

State management: Redux, Zustand, Context API, React Query / TanStack Query

Languages & markup: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS

Build & tooling: Vite, Webpack, Storybook, StencilJS (web components), Git, GitHub Actions CI/CD

Testing & quality: Jest, Playwright, axe-core accessibility automation, visual regression, ESLint/Prettier

APIs & data: REST, GraphQL, AG Grid (data-heavy UIs), API integration with backend/data teams

Practices: Front-end architecture, design systems, WCAG 2.1 AA accessibility, code reviews & mentoring, Figma-to-code

WORK EXPERIENCE

Senior Frontend Engineer

Mar 2024 – Present

WPP (Marketing Communications India), Bengaluru · StencilJS, React 18, TypeScript, SCSS, Storybook, Jest, Playwright, axe-core, GitHub Actions

- Core contributor to WPP Open's design system — a monorepo of 76+ reusable web components with React, Vue, and Angular bindings, used by product teams across the company.
- Own the design system's WCAG 2.1 AA accessibility programme: built an automated audit pipeline (Playwright + axe-core) scanning 165 Storybook stories across 76 components against 50 WCAG criteria, and produced conformance evidence used in a UK Government preliminary assessment.
- Remediated key components (datepicker, time-picker, search, breadcrumb, chat) to zero serious/critical accessibility violations, implementing W3C ARIA APG keyboard patterns (combobox, treeview, tabs, menu).
- Led the rich-text editor migration from Quill.js to Tiptap v3 — the library's largest single feature — including full migration guides and backward-compatible APIs.
- Drove major-version (v4) release preparation: removed 17+ deprecated APIs, resolved npm security vulnerabilities to a clean audit state, and kept 1,700+ unit tests green across 109 suites.
- Conduct regular code reviews (13 PRs reviewed in a single month) and mentor the team through reusable engineering playbooks and coding standards; support consuming teams as a design-system

point of contact.

Senior React Developer

Mar 2023 – Dec 2023

Planet Payment (Expian Technologies), Bengaluru · Next.js, React, GraphQL, React Query, TypeScript, Tailwind CSS

- Built data-driven business applications for a global integrated payments platform (acquiring, processing, digital wallets, VAT refund, currency conversion).
- Wrote high-quality, cross-platform TypeScript/HTML/CSS with a focus on fluid navigation and accessibility optimisation.
- Reviewed product requirements to provide development estimates and product feedback.

Senior Engineer — Frontend

Feb 2022 – Jan 2023

Preqin India, Bengaluru · React, Redux, JavaScript, HTML, CSS

- Designed and implemented user-facing features on pro.preqin.com — investor and fund-manager profile contacts data transformation, plus subscription-package restrictions across all users.
- Built reusable components and front-end libraries; reviewed code and provided feedback to raise codebase quality.

Technical Lead

Sep 2020 – Feb 2022

Wipro Limited, Bengaluru · React, JavaScript, HTML, CSS

- Led front-end delivery for Santander Bank US — a consumer web application for banking products.
- Translated Figma designs into reusable, efficient UI components; coordinated across QA, server, design, and product teams.

Lead Consultant

Jan 2019 – Sep 2020

ITC Infotech, Bengaluru · React, JavaScript, HTML, CSS

- Developed end-user insurance applications for RSA (Royal Sun & Alliance, UK) — requirement study, planning, and development.

Senior Software Developer

Dec 2015 – Dec 2018

Meredith India (Time Inc India), Bengaluru

- Front-end development for digital media properties; began the transition into the React ecosystem.

Earlier roles — HCL Technologies · Mindtree · Infosys

Jul 2011 – Dec 2015

- Senior Software Developer (HCL, Mindtree) and Systems Engineer → Senior Systems Engineer (Infosys) — web application development across enterprise projects.

EDUCATION

B.E. Electronics & Communication · GMIT Davanagere — Visvesvaraya Technological University, Belgaum · 2011

ADDITIONAL INFORMATION

Languages: English, Hindi, Kannada

Work mode: Remote-ready — fully equipped home office; experienced in distributed teams across UK/EU time zones

Passport: Valid Indian passport; EU Blue Card (valid till Oct 2026)
